Employment Opportunity

Research Scientist

Qualified Ph.D. candidates and post-doctoral research associates are invited to apply for the position of Research Scientist at Clear Science Corp. in Harford, NY. Requirements include a Ph.D. in Mechanical, Aerospace, Chemical, or Civil Engineering, Physics, or Applied Mathematics with expertise in the area of Computational Fluid Dynamics as reflected in the candidate’s published work. The successful applicant will have a firm background in Applied Mathematics with demonstrated skills in developing computational algorithms and models for prediction and control, design optimization, and uncertainty analysis. Clear Science Corp. engages in leading-edge research in the area of fluid mechanics and seeks applicants who are self-motivated and capable of working independently on challenging problems in the field. Requisite skills include programming in C/C++, Fortran, Python, and Matlab on both LINUX/UNIX and Windows operating systems. Clear Science Corp. is located in the Fingerlakes region of Upstate New York near Cornell University. Salary will be competitive based on qualifications and experience. Clear Science Corp. offers a 401(k) plan, profit sharing, and a medical-benefits plan.

****Please note that applicants must be United States citizens or U. S. Permanent Residents****
