Important Notes for Advising

• Students will no longer be able to substitute Eng 45 + MSE 113 for ME 108 starting Fall 2015.

• Students will no longer be able to substitute CS 61A for E7 starting in Fall 2015.

• EE 100 and EE 40 no longer exist (for advising purposes). EE 16A has taken its place.

• Lower Division Technical Electives can only count for 3 of the 18 total required Technical Elective units.

• E10 and E28 have been replaced by three courses: E25, E26, E27. Information on the transition can be found at http://me.berkeley.edu/undergraduate/course-information/design-course-transition

• Many students are taking courses for which they have not taken the prerequisites. Advisers should be on the lookout for this and discourage it.

• Junior transfers are not required to take E10 (old curriculum) or E26 (new curriculum).

• If you advise a joint major, please be on the lookout for students who try to take their ME Tech Electives outside of the department. Joint majors do not have to take nearly as many as our regular ME majors, so these need to be pre-approved by the Vice-Chair before the students take them.
