

Mechanical Engineer

Supplier Link Services, Inc. is looking for a recent mechanical engineering graduate to assist with incoming quality inspection support at the Tesla Motors manufacturing facility in Fremont, California. The ideal candidate will support a fast-paced 24-hour operation running up to seven days per week.

Typical assignments include:

- Communicating with supplier contacts;
- Writing work instructions;
- Training, supervising and managing teams of inspectors;
- Preparing daily activity reports for clients;
- Working with Tesla engineers and production control personnel to efficiently route suspect material through the inspection and rework process;
- Monitoring lineside reject tables and investigating lineside fit, and function issues.
